

# Embedded Systems Design Experts

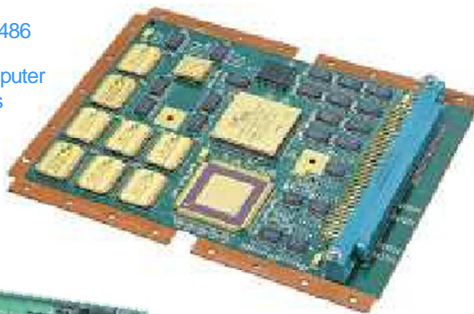

We are engineering consultants for embedded system product design. Our customers come to us for our experience in designing hardware and software products to their specifications. Call for a free quote and see what a difference experience makes.

24 Port G.shdsl Line Card with PowerPC and VxWorks

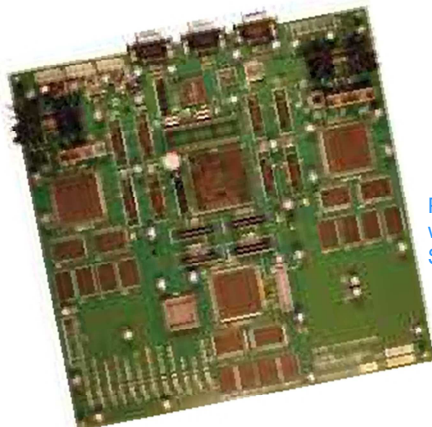

Space Qualified 486

Single Board Computer with VxWorks

ColdFire Controller with Custom Operating System

Quad OC-3c/STM-1 WAN Card with VxWorks

Triple Redundant PowerPC Evaluation Board with Custom Operating System

XA-H3 16 Bit Microcontroller and Custom Operating System with Remote Web Control

## Design experts for:

- Custom circuit board designs including x86, ColdFire, PowerPC, StrongARM and other microprocessors and microcontrollers.
- Linux, VxWorks, Windows, and custom software systems.

## We will help you:

- Define your requirements
- Architect the hardware and software
- Develop circuit boards and software systems
- Transition from prototype to production
- Provide on-going training and support
